

Weeneebayko Area Health Authority (WAHA) Redevelopment Project

OSHKI KISKINOWACIHTAWIN | NEW BEGINNING

Community Engagement Newsletter | July 2025

The Weeneebayko Area Health Authority (WAHA) Redevelopment Project team continues to meet with communities to listen, share updates, and gather feedback as construction moves forward. Community feedback sessions were held in July in Moosonee and Moose Factory to hear from community members about employment opportunities, construction progress, and integration of the workers' camp.

Community Design Sessions continued in July in Attawapiskat First Nation (July 29), where updated hospital design and signage options were shared. Thank you to everyone who provided important feedback to help guide the new hospital's final design and how services will be delivered.

The Community Engagement Team was present at the Gathering of Our People Festival in Moose Factory, connecting with many community members. It was a joy to be a part of such a vibrant cultural celebration – we're already looking forward to next year!

Renee Sauer, Community Engagement Lead, and Katrina Rickard, Administrative Assistant - Indigenous Relations, speak at the July 16 Community Feedback Session in Moosonee as community members listen on.

In the months ahead, we will be present at the Kashechewan Resilience Festival from August 10 to 12, will host our first virtual Community Meeting, and will join the Old Post Gathering event in Fort Albany in September. More information will be shared on the [WAHA Redevelopment Facebook page](#), and in the community.
