

Construction crews recently completed a major milestone by installing large prefabricated mechanical-electrical modules into the mechanical penthouse of the future regional hospital.

What looks like a single crane lift is the result of many teams working together behind the scenes. → [SEE PAGE 2](#)

SITE PREPARATIONS ARE UNDER WAY

At the site of the future Moose Factory Ambulatory Care Centre, tree clearing has been completed, and excavation crews will remain active through September and October. Foundation work, including piling, is expected to begin mid-October. Be sure to follow the WAHA Redevelopment Project on Facebook for the latest construction updates and community notices for the Island.

HE BUILDS

Joshua Moses is a pre-apprentice with Cambridge Drywall Services and a member of Moose Cree First Nation. He is currently helping to build the new regional hospital, contributing to a project that will support healthcare for communities across the region for generations to come. He was proud to add his signature to one of the last beams for the hospital as a community member and as a tradesperson helping to bring the hospital to life.

“What stands out most to me is the people. I’m working with a great group of builders; great guys with the knowledge and determination to make a project of this scale happen. It’s been an amazing journey so far.”

BUILDING SYSTEMS TAKE SHAPE

Hidden beneath the protective white wrap is a prefabricated module containing essential equipment and building systems.

Before this module could be lifted into place, electricians, steel workers, roofers, drywall installers and other trades coordinated their work to prepare the space.

To make installation possible, a temporary opening was left in the roof, allowing cranes to lift the modules into place before the roof is completed.

Once installed, the module (one of six) will become part of the system delivering heating and cooling to the hospital and Long-term Elder Care Lodge.

Congratulations to the project teams for their precise and safe work!

LOOKING BACK ON SEPTEMBER 9

One Beam, Many Hands

“

We are gathered to add our signatures to one of the final structural beams for the Hospital.

The beam represents thousands of hours of collaboration, planning, innovation, and hard work that have brought us to this milestone.

Today is an opportunity to celebrate the progress we have made together.

”

Martin Jacques, Chief Operating Officer, Buildings, Pomerleau

From left to right - Top to bottom: 1 → Some of the Pomerleau team honoured to be involved in this project. 2 → Martin Jacques, Chief Operating Officer, Buildings; Carman Tozer, WAHA Board Chair; Grace Delaney, Elder, Board Member; Lynne Innes, President and CEO WAHA; Dr. Elaine Innes, Chief of Staff, WAHA. 3 → Signatures from some of the communities. 4 → Pierre Pomerleau, Executive Chair of the Board, Pomerleau, adds his signature to the beam. 5 → Members of the Walters Group team, the steel erectors, proudly add their names to the one of the last structural beams.

COMMUNITY ENGAGEMENT

UPCOMING EVENTS

SEPTEMBER 30 National Day of Truth and Reconciliation
Reflection and Learning for construction teams on the Moosonee site.

OCTOBER 7 Community Dinner • Town Hall in Moosonee : Join us for a meal and learn more about the progress on the future hospital, employment and business opportunities and site operations. Watch for details on Facebook.

OCTOBER 16 Stop by the Moose Cree Complex on Moose Factory Island to learn more about construction of the future Ambulatory Care Centre and upcoming tender and employment opportunities. Watch for details on Facebook.
